/106 cont./
the Miao. Their number will depend upon the number of villages put under control, and they shall be appointed by the governor-general and governor's yamen and also be under the control of regional officials. If there are fights, robberies and thefts among the Miao these native officers will be asked to make the arrests. On their inspection tours, the governor-general and governor and military officials should examine the merits and demerits of these officers and reward or punish them accordingly to demonstrate justice, following the recommendations memorialized by Governor-general Ho Lin. When the t'ang-hsin system of communication in the Miao area has been abolished, official communications should be despatched according to old methods so as to avoid delay. In the regions where the t'ang-hsin system exists as before, the local officials /t'u kuan/ should be asked to pick out honest Miao to be given the responsibility of delivering messages after being questioned, to be paid wages and rations from unallotted funds, according to the scale for t'un soldiers. When officials traveling on official business need servants, then order the said Miao to serve, and pay them wages according to recommendations memorialized." (1)

1. See "I Wen Chih" in Miao Fang Pei Lan, Vol. 19.

According to the despatch quoted above the Miao officials, although they were military officers such as the native shou-pei and ch'ien-tsung, aside from their jurisdiction over the Miao soldiers, were also given considerable authority in Miao civilian affairs. In the tenth year of Chia Ch'ing /1805/ /107/ the t'un land within the Miao area were placed under the control of Miao officials. Article 8 of Pu Fu T'un t'ien Chang-ch'eng /The Ministry's Reply concerning Regulations about the T'un Land/ states: "It would seem that after the Miao rebels were pacified in the present year in the various localities of Yung-sui,

/107 cont./

C 175 631 563 M *175 631 *648 *425 C M [701] C [651] the Miao were greatly impressed by the strength of the Imperial army and surrendered land previously forcefully occupied by them. Also it would seem that if there was property of refractory Miao; it was confiscated. The fields were distributed among the law-abiding Miao to plant and pay rent, so that a Miao army could be raised and supported. Now the usurped land surrendered in the various villages totals more than 30,100 mu, and the land confiscated from the property of the rebel Miao totals more than 5,040 mu. These are now being separately registered, distributed for tilling for rent, and the revenues derived therefrom should be able to support 5,000 Miao soldiers. Among the 9,900 native Miao soldiers discharged over time and remaining, those able to bring up a plan to make a living have been sent back to their villages, and those who are old, weak, and poor have been given fields to till. Now 5,000 strong and healthy Miao soldiers have been selected, 2,000 of whom come from Feng-huang sub-prefecture; 800, from Kan-chou sub-prefecture; 1,800 from Yung-sui sub-prefecture; 100, from Ku-chang-p'ing sub-prefecture; and 300, from Pao-ching hsien. To collect the grain given over as rent, the Miao petty officers have selected in the various villages spots for building granaries to store away the public grain. Two or three honest Miao officers are chosen for each granary to supervise receipts and disbursements of the grain. The said 35,000 mu of arable land is estimated to be capable of yielding more than 22,000 shih of seeds of grain. It is estimated that there remain in various Miao granaries about 40 shih of seeds of grain, which will be used to fill the need for rations for the Miao soldiers in the intercalary month. The Miao officers are still ordered to report the actual receipts of rent grain every year." (1)

000 empty, and there was fear that the fierce Miao would start a
C rebellion. At this time Fu Nai of Yüan-ch'en tao met with
175 Brigade General Fu Chih-na of Chen-kan Chen and summoned
563 together people of the sub-prefecture to discuss a long-range
701 plan. And so they began the t'un system of defense. Fields
651 were allotted to feed the fighters and to defend the guard houses
425 against the Miao. As for the people's /i.e. Chinese/ land,
except for fields for sustenance, a male could retain three tou
of grain, a woman one tou. As for the rest of the land, seven
were allotted while three were retained, for one shih of grain
three tou was personally retained, and seven tou given up for
C allotment, to feed the fighters and guard the frontier. In the
[712] Feng-huang area there were more than 830 stone guard houses,
requiring 4,000 men to man them in rotation. Further, 1,000
men were trained to be combat ready. The more than 22,000
mu of land allotted were not enough to meet the expense, and
so another allotment of more than 12,300 mu at Lu-ch'i and
C Mo-yang was made. There were also 127 stone petty military
[712] stations /tiao pao/ at Kan-chou, manned by 800 soldiers,
supported by more than 2,170 mu of allotted land. The
original sect of government of Yung-sui, before the Miao
rebellion during the reign period of Ch'ien Lung and Chia Ch'ing,
was at Wei-ch'eng, which was entirely surrounded by the Miao.
In the second year of Chia Ch'ing /1797/, the seat of govern-
C ment was moved to Hua-yüan with a newly built yamen.
[712] There were 126 stone guard houses with 2,000 soldiers. The
people's land, i.e. Chinese land, usurped by rebels and re-
covered for public use, totaled more than 17,110 mu. There
were over 70 stone military stations /tiao pao/, at Pao-ching,
with 300 soldiers and over 2,170 mu of allotted land. There
were only 18 stone guard houses at Ku-chang-p'ing with a
hundred soldiers and over 120 mu of allotted land.

M The above refers to Chinese t'un /min t'un/. In addition,
* [175] there were also Miao t'un. After the suppression of the Miao
* [648] rebellion, the Miao tribes, awed by military might, surrendered
[651] all the Chinese land formerly forcefully usurped by them, and

/115 cont./ also searched into the properties of the rebel Miao and decided to return them for public use. The forcefully usurped land totaling over 30,100 mu and the rebels' properties totaling over 5,400 mu were redistributed among the law-abiding Miao to farm. Granaries were built to collect rent /tsu/ for the maintenance of Miao soldiers. The pressing for rent, the inspecting of fields, the distribution and transportation of grain, and other duties were all the responsibility of Miao officials.

/116/ The total amount of Chinese land and Miao land given up for allotment in the seven sub-prefectures and hsiens of the Miao area was as follows: (1)

1. Hunan Miao Fang T'un Ch'eng K'ao, Chapter 7, "Chün T'un-San," "Chün T'un T'ien Tu Ts'ung Shu" /"The Total Amount of Allotted T'un Land," in "Allotted T'un," 3/," numbers set after the subduing of the Miao in 1797.

1. Feng-huang Sub-prefecture
   (1) Allotted fields 22,080.6 mu (allotted in the fifth year of Chia Ch'ing /1800/).
   (2) Fields returned to public use 3,539 mu (Chinese fields usurped by the Miao but surrendered when called on and returned for public use).
   (3) Fields redeemed by the government 5,587.3 mu. (Chinese fields granted to the Miao at a low pledge but redeemed by the government for public use).
   (4) Fields usurped by the rebels surrendered by the Miao 7,650.8 mu (Miao rebels' property, wrongfully farmed by them, surrendered to the government for public use).
   (5) Usurped rebel land returned by the Miao 5,983.7 mu (same as above).

/116 cont./

(6) Private fields presented by Miao 1,595.7 mu (private property contributed by Miao after receiving an official post).

(7) Reclaimed fields 145.8 mu (barren land without crops reclaimed by soldiers).

2. Kan-chou Sub-prefecture

(1) Allotted fields 3,628.8 mu.

(2) Land redeemed by the government 776.5 mu.

(3) Usurped rebel fields surrendered by the Miao 3,487 mu.

(4) Usurped rebel land surrendered by the Miao 196.1 mu.

(5) Disputed usurped fields given up by the Miao 578.5 mu (now become public fields).

(6) Disputed usurped land given up by the Miao 48.8 mu (same as above).

(7) Private fields surrendered by Miao on request 604.6 mu.

3. Ku-chang-p'ing Sub-prefecture

(1) Allotted fields 529.7 mu.

/117/ (2) Fields redeemed by the government 93.4 mu.

(3) Usurped rebel fields surrendered by the Miao 127.8 mu.

(4) Private fields given up by other Miao 227 mu.

4. Pao-ching Sub-prefecture

(1) Allotted fields 2,178.6 mu.

(2) Fields redeemed by the government 628.6 mu.

(3) Usurped rebel fields surrendered by the Miao 1,476 mu.

(4) Usurped rebel land surrendered by the Miao 303.6 mu.

(5) Private fields presented by Miao petty officers 300.2 mu.

(6) Disputed usurped fields given over by the Miao 296.9 mu.

2:Ling & Ruey--173 E-5 (1933) 1947 AE5 Miao AE5
Central China AF14

/117 cont./

5. Yung-sui Sub-prefecture
   (1) Fields returned to public use 16,114.3 mu (Chinese fields usurped by the Miao taken back by the government for public use).
   (2) Redeemed fields 8,468.7 mu.
   (3) Rebel fields surrendered by the Miao 5,940.7 mu.
   (4) Rebel land surrendered by the Miao 9,895.7 mu.
   (5) Private fields contributed by Miao petty officers 500.4 mu.
   (6) Disputed usurped fields given up by the Miao 287 mu.
   (7) Disputed usurped land given up by the Miao 345.6 mu.
   (8) Reclaimed fields 2,545.5 mu.
   (9) Reclaimed land 10,130 mu.
6. Lu-ch'i Hsien
   (1) Allotted fields 5,382.5 mu.
7. Mo-yang Hsien
   (1) Allotted fields 6,983.1 mu.

/118/ The total of the above fields and land is 131,640.6 mu. In the thirteenth year of Chia Ch'ing /1808/ a total of 15,219.3 mu of fields and land was surveyed in the three hsien, Feng-huang, Kan-chou, and Yung-sui. In the sixteenth year of Chia Ch'ing /1811/ another total of 5,873.2 mu of fields and land was surveyed, totaling 152,157.1 mu of fields and land. Of this besides the land allocated to the army for horses and farming, land lost through floods and erosion, and also the land used for stone guard houses and surroundings, totaling 11,084.3 mu, and another 37,849 mu distributed among the t'un able-bodied males, leaders, the aged, and the young, there remained 103,223.8 mu. Farmers were recruited to farm this land and rent /in kind/ collected. The annual receipt in grain totaled 105,488 shih, three tou, and nine sheng.

The Miao frontier region is mountainous and lacking in fields. For the most part they develop mountain slopes, building up terraced fields for the cultivation of rice grown in

/123 cont./

C 701 425 651 The t'un fields in the Miao frontier were divided into people's /i.e. Chinese/ t'uns and Miao t'uns, the two being entirely different in nature. The t'un males working on the Chinese t'uns were also divided into t'un men and fighting men. The t'un men received fields to cultivate, and guarded the t'un guard houses. The fighting men, also called home guards, were solely trained for military operations, and did not farm. In the five sub-prefectures and hsiens of the Miao frontier there are 7,000 t'un men, from among whom are appointed hsiao-ch'i, tsung-ch'i, and pe-tsung to facilitate control. The distribution of fields was as follows: the men /san ting/ are each given 4.5 mu; the hsiao-ch'i, 5.5 mu; the tsung-ch'i, 6.5 mu; and the pe-tsung, 7.5 mu. There are 1,000 fighting men, each being given 3 shih, 6 tou of rice per year. The non-fighting men are also each given annually 10.8 liang of silver for salt and vegetables. The hsiao-ch'i receives each year 12 liang of silver; the tsung-ch'i, 13.2 liang of silver; the pe-tsung, 16.8 liang of silver. Therefore, in the Chinese t'un, the fields and land left over after the t'un men have received their fields to plant and care for are leased out for the collection of rent. Granaries (Illus. 57) have been built to store the grain, and general t'un leaders are set up to manage these matters. There

C 701 425 651 are no t'un men in the Miao t'uns, and the t'un fields are allotted to people to cultivate /Illus. 57 and 58 on pages 124 and 125/ /126/ for the collection of rent, in order to feed the Miao soldiers, under the control of the Miao officials. The t'un fields in the Miao frontier region, at the inception of the system, totaled 150,000 mu of arable land, of which barely a third was directly cultivated by t'un personnel, the rest being allotted out as rented fields. Today, the t'un army in the Miao frontier region is about 1,000 strong. The maintainance of the Black Flag Battalion of the Miao troops (Illus. 58) largely comes from the rented fields. T'un fields were set up to support troops on the spot as a defense against the Miao. Today, the Miao have been largely acculturated by the Chinese and the boundary line between the Miao and the Chinese is gradually becoming obliterated.

/126 cont./

obliterated. There is no longer the need for this kind of system of t'un defense against the Miao. In fact, unrest in the Miao area today is often due to the maladministration of the t'un fields system. The Miao petty officers and the t'un leaders often are oppressive in collecting rent and sometimes are corrupt in their methods, thus causing dissatisfaction and disturbances. In the twenty-sixth year of the Republic /1937/ the Miao rebellion in western Hunan arose because of the t'un land system. It resulted in the burning of t'un granaries and killing of t'un officers. Although the rebellion was pacified only after bloody and expensive campaigns, it is imperative to change the t'un and enter the newly opened or reclaimed land as available for taxation, so as to reach a fundamental solution.

/127/

CHAPTER EIGHT

MAGIC AND RELIGION

The Englishman, Bronislaw Malinowski, has said: "There are no people however primitive without religion and magic. Nor are there, it must be added at once, any savage races lacking either in the scientific attitude or in science, though this lack has been frequently attributed to them. In every primitive community, studied by trustworthy and competent observers, there have been found two clearly distinguishable domains, the Sacred and the Profane; in other words, the domain of Magic and Religion and that of Science." (1) According to the report

1. Malinowski: "Wu-shu K'o-hsüeh yü Tsung-chiao /Magic, Science and Religion/," paper in Science, Religon and Reality by

/80 cont./

A M 593 858 [152] reached an age when they can think for themselves. Jealousy also seems to play no great role among the adults; at any rate, among the Meau I could not find any manifestation of this trait. Meau parents are very loving toward all their children and, as was pointed out, regard them as their most precious possession.

A M 515 593 I repeatedly had the opportunity to observe how wives delouse their husbands while the latter were simultaneously performing this charitable act on their children (Ill. 62).[1] The parasites that they caught were placed between the thumb nails and cracked with pleasure. It was a picture of a family idyl!

M 593 [595] [429] [752] [270] [185] [614] [730] The love of the chief of the Meau for his wives and his children was always apparent. Concerning this, I noted in my journal: "He never disposes of their property without consulting them. If they are sick, he is meticulous in providing them with everything they need, even with opium." I have asked many Meau parents what their goal was in rearing their children. In the plans they mentioned, the idea of security was decidedly secondary, as is only natural. After all, the sib takes care of its members, and even if later on a person should survive all the other members of his sib, he would, if it came to the worst, place himself as an unfree person under the protection of an existing powerful sib (see the chapter, "Social Organization," the section on "Organization of the Family"). Of the

M 185 eight persons whom I asked about this, only one made a remark in which one could see the idea of security implied, but more as referring to himself. He was a chief with three wives and many children. He said to me: "Yes, now I am well off; I am rich and have many children who work for me. But when I was young, things were different. I was all alone with my first wife; we were poor and had to work hard, and yet we were hardly able to make a living, and we often had to go hungry."

M [858] The educational ideals of the Meau, which became manifest from the answers to my questions on the subject, differed according to the individual talents of the parents. Aside from that, however, they did not differ essentially among the two sexes. /Colored Pl. I appears here on an unnumbered page./
